IN DEVELOPMENT

::part and ::theme pseudo elements on shadow hosts

CSS

This specification defines the ::part() and ::theme() pseudo-elements on shadow hosts, allowing shadow hosts to se...

<dialog>: add DialogShowParams to show()/showModal()

DOM

Adds parameters to change how show() or showModal() is called.

<foreignObject> will be a stacking context

CSS

SVG2 specifies <foreignObject> to be a stacking contexts. Reference: <https://svgwg.org/svg2-draft/single-page.ht...>

ARIA 1.1

Misc

Implement the changes in version 1.1 of the Accessible Rich Internet Applications (WAI-ARIA) 1.1 spec.

Accessible Object Model (AOM)

DOM

This effort aims to create a JavaScript API to allow developers to modify (and eventually explore) the accessibility tr...

Add and update MHTML headers to support sharing of MHTML pages

Offline / Storage

To support sharing of MHTML pages, a new header Snapshot-Content-Location will be added. The existing Subject...

Add purpose member to the Web App Manifest

Misc

Chrome will use the purpose member in the Web App Manifest to determine which icon to use in the status bar for ...

Allow PaymentRequest.show() to take optional detailsPromise

Misc

Some users may not know the total or line items at the time of attempting to open the payment sheet with show() -- ...

AnimationWorklet

Graphics

AnimationWorklet is a standard for "declarative" stateful animations that run on a dedicated thread
